

1.4 Network security

Where this unit sits, what it covers, and how far

Where this unit sits

Qualification	GCSE Computer Science (9-1), specification code J277, from 2020
Component	Component 01: Computer systems — 80 marks, 1 hour 30 minutes
What OCR says the component covers	the central processing unit (CPU), computer memory and storage, data representation, wired and wireless networks, network topologies, system security and system software
This unit	topic 1.4 Network security
Checked	3 October 2026, at https://www.ocr.org.uk/qualifications/gcse/computer-science-j277-from-2020/specification-at-a-glance/

How far this has been checked. The topic numbers and titles below are the ones this course uses on its worksheets and slides. They were not re-checked against the published specification document when this map was built: the document could not be retrieved from this build environment. Check them against <https://www.ocr.org.uk/Images/558027-specification-gcse-computer-science-j277.pdf> before relying on this map for a scheme of work, and treat any finer subdivision as absent rather than assumed - no sub-point numbers are claimed anywhere in these documents, because none were verified.

Before it: 1.1 Systems architecture, 1.2 Memory and storage, 1.3 Computer networks, connections and protocols

After it: 1.5 Systems software, 1.6 Ethical, legal, cultural and environmental impacts of digital technology, 2.1 Algorithms, 2.2 Programming fundamentals, 2.3 Producing robust programs, 2.4 Boolean logic, 2.5 Programming languages and Integrated Development Environments, PY Python programming

The lesson sequence and the questions it answers

#	LESSON	THE BIG QUESTION	ACTIVITIES	MARKS
1	Threat map ns-101	What forms of attack threaten a network, and what do attackers want?	11	23
2	Malware lab ns-102	How do the different types of malware spread, and what damage do they do?	12	19
3	Database break-in ns-103	How does an SQL injection attack work, and how can it be prevented?	12	19
4	Phishing inbox ns-104	How can you recognise a phishing message, and what should you do about it?	12	19
5	Social engineering HQ ns-105	What does a phishing attack set out to achieve?	12	22
6	Cracking lab ns-106	How does a brute-force attack work?	13	18
7	Traffic flood ns-107	How does a denial-of-service attack work, and how can it be defended against?	13	17

#	LESSON	THE BIG QUESTION	ACTIVITIES	MARKS
8	Packet sniffers ns-l08	How is data captured in transit, and how can it be protected?	12	19
9	Defence depot ns-l09	Which protections stop which attacks, and why does no single one stop everything?	13	25
10	Defence depot 2 ns-l10	How can we protect ourselves against hackers?	12	24
11	End-of-topic test ns-l11-test	assesses the whole unit	0	0
12	Cyber defence ns-bonus	stretch work, no new content	1	0

Prior knowledge, vocabulary and skills

Assumed before the unit: the outcomes of 1.1, 1.2, 1.3

Vocabulary introduced: Malware, Social engineering, Virus, Ransomware, SQL injection, Input validation, Phishing, Blagging, Shouldering, Brute-force attack, Password, Denial of service, Botnet, Data interception, Encryption, Penetration testing, Firewall, Physical security

What a pupil does, not only reads: defence, match, mcq, multi, order, sort

Coverage matrix

Every outcome this unit states, and whether it is taught, practised and assessed **within this unit**. Full means all three; partial means some; not covered means none of the three could be traced.

How this was worked out. The trace is derived by matching the content words of an outcome against the station text, the activities and the exam questions of the unit, not authored by hand. The words each match was made on are in build/coverage.json. It shows where to look; it does not certify that the alignment is right, and a full row has not been checked by a person either.

OUTCOME	LESSON	TAUGHT	PRACTISED	ASSESSED	COVERAGE
understand the different forms of attack against computer systems ns-l01-o1	ns-l01	yes	yes	yes	Full
understand the threats of various forms of malware ns-l02-o1	ns-l02	yes	yes	yes	Full
understand how to identify and protect against malware ns-l02-o2	ns-l02	yes	yes	yes	Full
understand the concept of SQL injection ns-l03-o1	ns-l03	yes	yes	yes	Full
understand how to protect against SQL injection ns-l03-o2	ns-l03	yes	yes	yes	Full
understand what phishing is ns-l04-o1	ns-l04	yes	yes	yes	Full
understand how to identify and protect against phishing ns-l04-o2	ns-l04	yes	yes	yes	Full
understand what phishing is ns-l05-o1	ns-l05	yes	yes	yes	Full

OUTCOME	LESSON	TAUGHT	PRACTISED	ASSESSED	COVERAGE
understand how to identify and protect against phishing ns-l05-o2	ns-l05	yes	yes	yes	Full
understand the ways people are a weak point ns-l05-o3	ns-l05	yes	yes	yes	Full
understand what a brute-force attack is ns-l06-o1	ns-l06	yes	yes	yes	Full
understand how to identify and protect against brute-force attacks ns-l06-o2	ns-l06	yes	yes	yes	Full
understand what a denial-of-service attack is ns-l07-o1	ns-l07	yes	yes	yes	Full
understand how to identify and protect against denial-of-service attacks ns-l07-o2	ns-l07	yes	yes	yes	Full
understand the threat that data interception and theft poses ns-l08-o1	ns-l08	yes	yes	yes	Full
understand how to identify and protect against data interception ns-l08-o2	ns-l08	yes	yes	yes	Full
understand the ways people are a weak point in system security ns-l09-o1	ns-l09	yes	yes	yes	Full
know how penetration testing, anti-malware, firewalls and user access levels help against cyberattack ns-l09-o2	ns-l09	yes	yes	yes	Full
know how passwords, encryption and physical security help against cyberattack ns-l10-o1	ns-l10	yes	yes	yes	Full
be able to choose suitable protections for a given threat ns-l10-o2	ns-l10	yes	yes	yes	Full

20 full · 0 partial · 0 not covered, of 20 outcomes.

Gaps, assumptions and overlap

None found by the trace.

What could not be traced

The wall text of ns - bonus is painted into the 360 image and held nowhere as text, so an outcome in that lesson can only be traced through its activities and its exam questions. Read the rows above for it with that in mind.

Revise 360 — a product of Revise 360 Ltd, created by Olly Pettitt. An independent resource: not written, endorsed or approved by OCR or any exam board. Classroom use and personal study only.
